## Data description

---

### Abstract

---

During three months local assistants collected policy papers in all departments and held interviews with resource persons in relevant water institutions of the state, the donors and civil society organisations. There was a focus on the newly implemented communes, since at communal level water policies should be coordinated since the decentralisation in 2002. The table of contents of the policy documentation can be downloaded/requested. The original documents do not exist as digital file. Parameter, Attribute list: number of different water points, percentage of functional water points. Dataset created by IMPETUS subproject A5.

No information about Data Lineage; No information about Data Consistency; No information about Data Completeness; No information about Positional Accuracy; No information about Quantitative Attribute Accuracy

### Observing strategy

---

The aim of the policy documentation was to collect water relevant policy papers in all departments of Benin. These serve as a base for policy analysis with regard to the performance of past and future water policies in the context of the IMPETUS scenario analysis and future capacity measurements.
